Css	Tailwind	Next js	Java
Javascript	Git & Git Hub	Angular	oop
Typescript	React js	Oracle Data base	Data structure & Algorithm

SOFT SKILLS

Problem Solving	Self Learning	Time management
Communication skills	Team work	

PROJECTS

E - commerce
This project aims to develop a user-friendly e-commerce website dedicated to selling a wide range of clothing items for men, women, and children. The platform will showcase a variety of styles, from casual wear to formal attire, allowing customers to shop effortlessly from the comfort of their homes.

Platform for Students and Mentors
This platform offers personalized guidance, progress tracking, and efficient session management.

Airline ticket booking services
This project focuses on developing a comprehensive web platform for airline ticket booking services, designed to provide users with a seamless experience in searching, comparing, and purchasing flight tickets. The platform aims to cater to both leisure and business travelers by offering a wide range of airlines, destinations, and competitive pricing.
